

CS-Cart airpay payment kit installation

CS-Cart Version : 4.14

Airpay Payment Kit Version : 3

About:

This file is a technical guide for integration of **Cscart** backend with **airpay**. Please refer to below guidelines for integration.

A. Instructions:

Fill up Airpay integration formation form

- You need to provide your domain URL and Success Url to airpay operations team.

Steps for adding plugin files to your CSCART installation

1. Copy the **airpay.php** file from \app\payments\ (from plugin) and place to \app\payments\ (to cscart installation)
2. Copy the **airpay folder** from \app\payments\ (from plugin) and place to \app\payments\ (to cscart installation)
3. Copy the **responsefromairpay .php** from app\controllers\frontend (from plugin) and place to app\controllers\frontend (to cscart installation)
4. Copy the **airpay folder** from \app\addons (from plugin) and place to \app\addons (to cscart installation)
5. Copy the **admin_admin.tpl** from \design\backend\templates\views\payments\components\cc_processors (from plugin) and place to \design\backend\templates\views\payments\components\cc_processors (to cscart installation)

Enabling the Module and configuring it with your airpay merchant credentials

- Login to cscart's admin section, Goto Addons->Manage Add-ons
- From Add-on list find Airpay addons and make activate Airpay Addons
- Create a necessary payment: go to Administration -> Payment methods -> , the click on '+' symbol to create,
- Enter the payment name as airpay, choose the necessary Processor 'airpay'.
- Upload airpay logo provided in kit in Icon field using Local option.
- A tab "Configure" will appear where you will have to type in all necessary information like Your Merchant ID, secret key (API Key), User name and Password provided by airpay. And Save the Details.

Testing Airpay

- Make sure that all details are entered in the airpay configuration.
- Go to your store and place an order.
- If you configured airpay correctly in the previous step, it should appear as an option under payment methods during checkout.
- When you click on checkout, it should redirect you to airpay's site and show credit card form.
- Then fill the essential bank credential to form and submit it.
- Then you will get response message according to your transaction failed or success.

Checking the status of payment transaction at airpay's end from your Cscart site

- After getting response message you will get link for check the history.
- Click on the that link. This will show details of your order

D. Data captured.
