

Magento-2.x-Airpay Plugin

About:

This file is a technical guide for integration of merchant backend with AIRPAY. Please refer to below guidelines for integration.

A. Instructions:

Fill up Airpay integration form

- Login to your Airpay Account and Go to My Account > Integration
- For Success Url, enter the following url <http://youtstorehomeurl.com/airpay/payment/response>
- Enter other details, generate key and press save

Adding module files to your magento installation:

- Please take a backup of your code for safety.
- Please make sure that app/ directory is writable.
- Inside app folder create a folder as name code
- Inside the code folder place the Airpay folder from extracted magento kit (path:/app/code/Airpay/Airpay/)
- Then run below commands as root from app/ directory.

```
$ cd ..
```

```
$ php bin/magento cache:clean
```

```
$ php bin/magento cache:flush
```

```
$ php bin/magento setup:upgrade
```

```
$ php bin/magento module:enable Airpay_Airpay --clear-static-content
```

```
$ php bin/magento setup:di:compile
```

Enabling the module and configuring it with your airpay merchant credentials

- Navigate to 'https://<your_server_domain>/admin/' in your browser to configure AirpayPayment.
- Navigate to 'Stores > Configuration > Sales > Payment Methods'
- Find 'Airpay' Payment Method

- Enter your Airpay Merchant details and click Save Config

Note: If Airpay is not visible as a payment method, try clearing cache from System > Cache Management.

Testing Airpay

- Make sure that sandbox mode is on and all details are entered in the airpay configuration.
- Go to your store and place an order.
- If you configured airpay correctly in the previous step, it should appear as an option under payment methods during checkout
- When you click on checkout, it should redirect you to Airpay's site and show credit card form

Checking the status of payment transaction at Airpay's end from your magento admin

- Login to admin and under Sales, click on Orders.
- Click on the first order in the data grid. This should be the order that you just placed
- When the order details page opens up, look for "Payment Information" block. Inside the block, you can see the latest status of the transaction on airpay's end.

B. Data captured.

* represents mandatory.

** Hardcode these example values

***chmod variable contains Payment Modes available for user. for e.g. If you want to show only Credit Card/Debit Card, then value of the chmod variable will be "pg". If you want Netbanking and Prepaid card then value of the chmod variable will be "nb_ppc". If you want to show all payment options activated for you at airpay, then leave this variable blank.

	Data	HTML variable name	Data Format	Data Length	Example
